

How we handle communicating with you if and when your child receives care from the Kalsman medical team

Welcome to camp! This is an exciting day for your child, and for you! We want to take a few moments and familiarize you with how and when we will contact you if your child needs support from the medical team here at camp. Your child's health and safety are our number one priority.

We will **immediately** call you if your child...

- has a health concern that is emergent or needs to be taken to a hospital
- needs to see a physician or other health care provider outside of camp
- requires a new prescription of any kind
- needs to stay in the health center for *one or more* nights

Finally, we will call you **as soon as possible** if your child is evaluated by the medical team more than twice and no definitive diagnosis is established.

We will typically not contact parents to share news of minor scrapes or similar minor and common ailments that are typical of active campers. Any camper with any form of “common cold” symptoms is evaluated following a structured algorithm developed by the URJ Medical Advisory Team, this includes a COVID Binax Rapid Antigen Test. We do not routinely call home when we are evaluating a camper with common cold symptoms UNLESS their Binax test is positive.

Please note that a child can “miss home” much more by talking to a parent while at camp. Therefore, we may call home to speak with a parent without having the parent speak to their child.

Please let us know if you have any concerns regarding this communication guideline.

Thank you!! And welcome to camp!

Ilana Mills & Davia Loren, MD
